*Size limitations exist and may cause butt jointed seams or horizontal seams going up the hood due to material sheet size, or human inability to brush straight. Hoods above 50" high with brushed finishes will require a horizontal seam.										
Hoods/Accent Kits that have brushed finishes may need to be bolted together at areas with tight corner transitions in order to accomplish a full brushed finish to the area.

DEALER PORTAL

We highly recommend accessing our free dealer portal which offers many helpful tools for our dealers! Our Status Check feature is a powerful tool that lets you see the live production status of each order in our system, as well as provide tracking and shipment information for orders that have shipped. Download brochures, pricebooks, and interactive order forms to increase your order accuracy. New signage and POS items have also been added that are only available through the portal!
